The Honorable JOCELYN G. BOYD

Chief Clerk/ Administrator

The Public Service Commission of South Carolina

**RE: Docket No.2010-328-C**

**Subject: The opposition to AT&T Motion to Vacate dated 2010-9-30**

Dear Ms. Boyd:

**I do request to deny AT&T Motion to Vacate Scheduling Order for the following reasons:**

1. This motion is without the merit. Exhibit 1 – ORS had not known (none of investigation they have done) that AT&T negligence has such national repercussions, especially for Gas Utilities. Also SC public interest in ORS hands.
2. Since AT&T started (at least since 2008) of U-versa project they should have necessary technical documentation and results of safety tests. To October 12, 2010, it is enough time to submit them to the Commission.
3. My professional, even limited, findings of AT&T failure of proper designing-installation – safety tests of VRAD installations create serious hazard for USA residents, facilities and, of course for **NATIONAL SECURITY**. If AT&T still wants to cover their criminal negligence by prolonging the “legal action”, the national interest requires using immediately any available protections available from SC authorities – probably with cooperation with Federal institutions and law enforcement.
4. Lately we have observed too many failures – too many explosions because of wrong permits. It this picture maybe Toyota recall is a good example of Corporation action in correct safety. On the other side are Pacific Electric and Gas Company charged by CPUC for gas explosion on 2010-9-9 in San Bruno, CA. All gas utilities in USA may have similar situation when VRAD would inject explosion energy as is right now here in SC. Here is well operating **SCE&G** which had informed me that AT&T never consulted with them their installation as they ignored this with me.
5. PSC Scheduling Order is on time, before November 2, 2010 Elections Day therefore it is politically correct.
